LOGLINE

On the Canadian frontier, a man seeks vengeance using a bone—a femur—as his only weapon.

SYNOPSIS

In the year 1883, a solitary man arrives in Grimstone carrying a bone—a femur—at his side. Seeking vengeance for reasons that only later become clear, he tracks down several individuals and bludgeons each of them to death with the bone. But his ritualistic pursuit of revenge is soon interrupted when he finds himself both falling for a woman and hunted by a vicious hired gun. *Bone* is a spare, ruggedly-poetic western.
